**PROFILE**

I recently completed my studies and received my architecture degree. During the latter part of my education, I had the opportunity to work at a couple of architecture offices as well as a landscape architecture office. By combining theoretical studies with practical work, I have been able to deepen and broaden my knowledge.

The architectural profession appeals to me in particular because it requires the ability to combine technical expertise with spatial understanding. Shaping the built environment based on the needs of society, in a way that both inspires and facilitates people's everyday lives, is a complex but highly motivating challenge.

EDUCATION

2026 Feb
